

## RESOURCES FOR MANAGEMENT OF NAS

- [www.ChildrensHospital.Vanderbilt.org](http://www.ChildrensHospital.Vanderbilt.org) “A Guide for Parents of Babies with Neonatal Abstinence Syndrome”
- <http://www.chop.edu/clinical/pathway/neonatal-abstinence-syndrome-clinical-pathway-> a clinical pathway for NAS
- [www.astho.org](http://www.astho.org) - (Association of State and Territorial Health Officials) Report on “Neonatal Abstinence Syndrome: How states can help advance the knowledge base for primary prevention and best practices of care”
- [www.nationalperinatal.org](http://www.nationalperinatal.org)
- [www.aap.org](http://www.aap.org)
- [www.feedingfundamentals.com](http://www.feedingfundamentals.com) - SOFFI Algorithm training and training. The SOFFI method is not meant to be used at the bedside or as an evaluation of the infants capabilities. Designed to provide guidance to the feeder, improve the consistency and continuity among feeders, and a result improved the feeding competency of the infant.\* **Excellent teaching and competency tool for staff and parents.**
