

Get the Full Program Suite with Unit-Wide Training

The IDF™ Program includes:

- Designated IDF Advisor with support from Pre-purchase through Go-Live
- Program implementation checklist
- Administrative access to unit specific reports
- IDF™ Scales Reference Cards
- QI Project Guidance
- Permissions letter to upload IDF™ Scales into EMR
- Policy and Procedure Guidelines
- Template for education handout
- PR Release Letter for hospital to post on website/newsletters, etc.
- Certification status of “IDF™ Certified NICU” upon completion of unit-wide training
- Access to IDF™ private Facebook page including IDF support with the program
- Monthly team phone call with your IDF Advisor from start to finish
- “Go-Live” presence with your IDF Advisor either in person or virtually

Join Thousands of NICU Professionals

All across the country, hospital systems have successfully implemented the Infant-Driven Feeding™ Program and have reported the following significant findings:

- Increased breastfeeding rates (from 20% to 62%)^{1,5}
- Improvement in Kangaroo Care¹
- Reduced time from initiation of oral feeds to full PO feeds^{1,2,3,4}
- Decreased length of stay (LOS)^{1,2,3,4,5}

idf
puts the cue

in the
NICU

Offers developmentally supportive, individualized, cue-based feeding with the first-and-only scalable online neonatal feeding courseware created for hospital staff.

Set the standard of care for feeding preemies in your NICU with the neuroprotective IDF™ Program.

- Research-based feeding program
- Internationally recognized feeding assessment tool for infants in the NICU
- Implementation results in shorter length of stay
- Provides improved caregiver competence in feeding infants
- Improves parent, nursing and provider satisfaction
- Offers improved feeding quality and outcomes
- Consistent education program valued by administration, providers, staff and families

Take Cue-Based Feeding to the Next Level

Save Time and Money

Cost savings reported by implementing the IDF™ Program:
