

Specialty Feeding System

5oz/150 mL and 9oz/270mL

Wide-Neck

A universal solution for complex feeding issues such as cleft lip and palate, ankyloglossia, high-arched palate, oro-neuromotor dysfunction, or rare syndromic sequences and/or craniofacial anomalies.

- Promotes “Infant-Directed” feedings, increasing safety and improving feeding experience
- Non-squeeze method reduces ingestion of air and is easy to use
- Typical bottle appearance evolves easily with the infant after cleft repair
- Preferred bottle choice of parents and professionals
- Compatible with any of Dr. Brown’s Wide-Neck Nipples
- Fully reusable
- Safe for dishwasher, microwave steam bag, and steam sterilization (autoclave*)
- Comes with 1 additional Wide Infant-Paced Feeding Valve**
- BPA free

Each unit is assembled with Wide-Neck Level 1 nipple, Wide Infant-Paced Feeding Valve, Cap,
1- Additional Wide Infant-Paced Feeding Valve, 1- Wire Cleaning Brush.
