

Specialty Feeding System

4 oz/120 mL and 8 oz/250mL

Narrow, Retail Packaging

A universal solution for complex feeding issues such as cleft lip and palate, ankyloglossia, high-arched palate, oro-neuromotor dysfunction, or rare syndromic sequences and/or craniofacial anomalies.

- Promotes “Infant-Directed” feedings, increasing safety and improving feeding experience
- Non-squeeze method reduces ingestion of air and is easy to use
- Typical bottle appearance evolves easily with the infant after cleft repair
- Preferred bottle choice of parents and professionals
- Compatible with any of Dr. Brown's Narrow Nipples
- Fully reusable
- Safe for dishwasher, microwave steam bag, and steam sterilization (autoclave*)
- Comes with 1 additional Narrow Infant-Paced Feeding Valve**
- BPA free

Each unit is assembled with Narrow Level 1 nipple, Narrow Infant-Paced Feeding Valve, Cap, 1- Additional Narrow Infant-Paced Feeding Valve, and 1- Wire Cleaning Brush in retail packaging.
